

Why is it called “Claude”?

It is named after Claude Shannon, the father of information theory.
The name symbolizes intelligence and communication.

Claude AI Models

Claude comes in different versions:

- Claude Opus → Most powerful (best for hard tasks)
- Claude Sonnet → Balanced (speed and intelligence)
- Claude Haiku → Fast and lightweight

Newer versions (like Claude 4) are very strong in reasoning and coding.

What Claude AI Can Do

Claude is very powerful in text-based tasks:

Writing

- Essays, stories, blogs
- Emails and scripts

Studying

- Explains topics
- Summarizes long documents

Coding

- Writes and fixes code
- Explains programming

Language

- Translation
- Grammar correction

Document analysis

- Can read very long files (even books)

It can also analyze images in some versions.

Special Feature: Constitutional AI

Claude is trained using something called Constitutional AI.

This means:

- It follows a set of rules and values (like honesty, safety, and helpfulness)
- It tries to give safe and ethical answers

This is a key reason Claude feels polite and careful.

What makes Claude unique?

1. Very long memory
Can handle huge text (100k–200k+ words) in one go
2. Strong reasoning
Good at deep thinking and structured answers
3. Calm and natural tone
Feels like talking to a thoughtful human
4. Safety-focused
Designed to avoid harmful answers

Limitations of Claude

- No built-in image generation (unlike DALL·E)
- Fewer tools and integrations

- Sometimes too strict or cautious
- Not as visually creative

Its main strength is text, not visuals.
